

HPW-DUST

High pressure water for dust suppression

High power pure water based dust suppression system with ultra fine water fog for superior effect:

- **Base Machines:** Demolition long boom excavators, loaders, crushers, pulverizers, breakers, drills, grabs, mobile crushers and screeners etc.
- **Applications:** Dust suppression in quarries, demolition sites, material handling areas, recycling and waste management, etc.
- **Features:** High power directional atomizing jets for targeted dust suppression; turbo jets or dousing umbrella for area dust suppression, foiling debris etc. Low water consumption: high power, no area flooding.

Hydraulic Equipment Pioneer
Powerful, compact and reliable. World's best power-to-weight ratio guarantees easiest on-board installation on all work machines. Dynaset hydraulic equipment creates more work with zero emissions.
